MCITP: Business Intelligence Developer

18 days of Instructor led training - 2 exams

MCITP: Business Intelligence (Two Exams Required)

MCITP: Business Intelligence Developer

Microsoft Certified IT Professional: Business Intelligence Developer (MCITP: Business Intelligence Developer) is the premier certification for business intelligence system designers and developers. This certification demonstrates that you can design analysis solutions, data transformations, and reports.

Business intelligence developers design and implement multi-dimensional database models (logical and physical), data marts, data warehousing, data transforms, data analytics, and reporting solutions. This includes programming and customizing servers that use Multidimensional Expressions (MDX), customer transforms, and custom reporting solutions. Business intelligence developers are typically employed by mid-sized to large-sized organizations.

Certification Track

MCITP: Business Intelligence Developer candidates must first complete the requirements for the MCTS: SQL Server 2005 Business Intelligence certification (one exam). After achieving this Technology Specialist certification, candidates earn their MCITP: Business Intelligence Developer by passing one required exam.

1. Pass the following exams. The courses listed below are recommended to prepare you for the associated exam:

MCTS: SQL Server 2005 Business Intelligence (One Exam Required) (Pre-requisite for MCITP)

Microsoft 2791 – Implementing and Maintaining Microsoft SQL Server 2005 Analysis Services
Microsoft 2792 – Implementing and Maintaining Microsoft SQL Server 2005 Integration Services
Microsoft 2793 – Implementing and Maintaining Microsoft SQL Server 2005 Reporting Services

Exam 70 – 445

AND

MCITP: Business Intelligence (One Exam Required)

2. Pass the following exams. The courses listed below are recommended to prepare you for the associated exam:

Microsoft 2794 – Designing a Business Intelligence Solution Architecture for the Enterprise Using Microsoft SQL Server 2005
Microsoft 2795 – Designing an ETL Solution Architecture using Microsoft SQL Server 2005 Integration Services
Microsoft 2796 – Designing a Multi Dimensional Solution Architecture Using Microsoft SQL Server 2005 Analysis Services
Microsoft 2797 – Designing a Reporting Solution Architecture using Microsoft SQL Server 2005 Reporting Services

Exam 70 – 446
