

MCITP: Database Administrator

7 days of Instructor led training - 2 exams (The 2787 Course is required for both exams)

MCITP: Database Administrator

Microsoft Certified IT Professional: Database Administrator (MCITP: Database Administrator) is the premier certification for database server administrators. This certification demonstrates that you can keep up with your enterprise business solutions 24 hours a day, 7 days a week.

Database administrators install or configure SQL Server and manage or maintain databases or multidimensional databases, user accounts, database availability, recovery, and reporting. They also design or implement security or server automation and monitor and troubleshoot SQL Server activity. Database administrators are typically employed by midsize to large organizations. After earning this certification, candidates earn their MCITP: Database Administrator by passing two required exams.

If you are a Microsoft Certified Database Administrator (MCDBA), you may upgrade to the MCITP: Database Administrator certification by taking one upgrade exam in the place of the two required exams. MCDBAs must still obtain the MCTS: SQL Server 2005 certification as a prerequisite.

Certification Track

MCITP candidates must first complete the requirements for the MCTS: SQL Server 2005 certification (one exam). After earning this Technology Specialist certification, candidates earn their MCITP: Database Administrator by passing two required exams.

If you are a Microsoft Certified Database Administrator (MCDBA), you may upgrade to the MCITP: Database Administrator certification by taking one upgrade exam in the place of the two required exams. MCDBAs must still obtain the MCTS: SQL Server 2005 certification as a prerequisite.

Candidates for this certification must pass two exams:

Two exams required -

- **Two core exams**

1. Pass the following exams. The courses and Microsoft Self Paced Training Kit listed below are recommended to prepare you for the associated exam:

Microsoft Self –Paced Training Kit – Microsoft (Exam 70-443): Designing a Database Server Infrastructure by using Microsoft SQL Server 2005*.

Microsoft 2787 – Designing Security for a Microsoft SQL Server 2005

Microsoft 2788 – Designing High Availability database Solutions Using Microsoft SQL Server 2005

Exam 70 – 443

2. Pass the following exams. The courses and Microsoft Self Paced Training Kit listed below are recommended to prepare you for the associated exam:

Microsoft 2787 - Designing Security for a Microsoft SQL Server 2005

Microsoft Self –Paced Training Kit – Microsoft® SQL Server™ 2005 Administrator's Companion*

Microsoft 2790 – Trouble Shooting and Optimising Database Servers Using Microsoft SQL Server 2005

Exam 70 – 444

Or upgrade from Microsoft Certified Database Administrator (MCDBA)

If you are a MCBDA, you can upgrade to the MCITP: Database Administrator credential by taking two upgrade exams. You do not need to obtain the MCTS prerequisite credentials if you take the upgrade exam.

1. Pass the following exams. The courses and Microsoft Self Paced Training Kit listed below are recommended to prepare you for the associated exam:

Microsoft Self –Paced Training Kit – Microsoft (Exam 70-443): Designing a Database Server Infrastructure by using Microsoft SQL Server 2005*.

Microsoft 2787 – Designing Security for a Microsoft SQL Server 2005

Microsoft 2788 – Designing High Availability database Solutions Using Microsoft SQL Server 2005
