

## MCTS: SQL Server 2005 Business Intelligence

9 days of Instructor led training - 1 exam

### MCTS: SQL Server 2005 Business Intelligence

Microsoft Certified Technology Specialists in Microsoft SQL Server 2005 Business Intelligence (MCTS: SQL Server 2005 BI) implement and maintain business intelligence solutions. They have thorough knowledge of the Microsoft SQL Server 2005 Business Intelligence Development tool suite. This includes knowledge of database schemas, debugging, monitoring, and troubleshooting Business Intelligence solutions, and working with the Microsoft .NET Framework. They can write database queries, use SSAS data mining algorithms, and create and deploy SQL Server Reporting Services (SSRS) reports. Additionally, they author and deploy SQL Server Integration Services (SSIS) packages. Technology Specialists typically pursue careers as database administrators, database developers, or business intelligence developers. They may also be developers and systems administrators who do not work with SQL Server daily but who want to show their breadth of technology experience.

### Certification Track

MCTS candidates must pass one exam that focuses on the implementation and maintenance of SQL Server 2005.

Pass the following exams. The courses listed below are recommended to prepare you for the associated exam:

- Microsoft 2791** – Implementing and Maintaining Microsoft SQL Server 2005 Analysis Services
- Microsoft 2792** – Implementing and Maintaining Microsoft SQL Server 2005 Integration Services
- Microsoft 2793** – Implementing and Maintaining Microsoft SQL Server 2005 Reporting Services

**Exam 70 – 445**
