

## MCTS: SQL Server 2005

10 days of Instructor led training - 1 exam

### MCTS: SQL Server 2005

The Technology Specialist certifications enable professionals to target specific technologies and distinguish themselves by demonstrating in-depth knowledge of and expertise in the technologies with which they work.

Microsoft Certified Technology Specialists in SQL Server 2005 (MCTS: SQL Server 2005) implement and maintain databases using specific instructions and specifications. They have thorough knowledge of the product, understand how to use the tools and Transact-SQL language, and know how to navigate the user interface. Technology Specialists are typically pursuing careers as a database administrator, database developer, or business intelligence developer. They may also be individuals such as developers and systems administrators who do not work with SQL Server on a daily basis but wish to show their breadth of technology experience.

### Certification Track

MCTS candidates must pass one exam focusing on the implementation and maintenance of SQL Server 2005.

The courses listed below are recommended to prepare you for the associated exam.
