MCTS: Microsoft Office SharePoint Server 2007, Configuration

A Microsoft Certified Technology Specialist in Microsoft Office SharePoint Server 2007, Configuration (MCTS: SharePoint Server 2007, Configuration) possesses a deep and broad understanding about properly configuring Microsoft Office SharePoint Server 2007 in a corporate environment. The qualified candidate for this exam typically has a general understanding of Office SharePoint Server 2007 and how to administer Microsoft SQL Server 2000 or 2005, as well as knowledge about security and Microsoft .NET 2.0 as they relate to SharePoint Server 2007. The candidate also possesses a general understanding of configuring these technologies: Microsoft Internet Security and Acceleration (ISA) Server, Windows Server 2003 Active Directory Administration, Microsoft Internet Information Server (IIS), network load-balancing for applications, and back-up restoration of data.

Certification Track

MCTS candidates must pass one exam that focuses on configuring Microsoft Office SharePoint Server 2007 Portal, managing Search, configuring Content Management, configuring Business Forms, managing Business Intelligence, managing Administration, and deploying/upgrading Microsoft Office SharePoint Server 2007.

The course listed below is recommended to prepare you for the associated exam.
