MCTS: .NET Framework 2.0 Distributed Applications

The Microsoft Certified Technology Specialist certifications enable professionals to target specific technologies and distinguish themselves by demonstrating in-depth knowledge of and expertise in the technologies with which they work.

Developers holding the Microsoft Certified Technology Specialist: .NET Framework 2.0 Distributed Applications (MCTS: .NET Framework 2.0 Distributed Applications) certification have demonstrated breadth and depth of skills and knowledge of Web Services, .NET Framework remoting, Enterprise Services, and Message Queuing technology.

Technology Specialists are typically pursuing careers as a Web developer, Windows developer, or enterprise applications developer. They may also be individuals such as database developers and systems administrators who do not work with the .NET Framework 2.0 on a daily basis but who wish to show their breadth of technology experience.

Certification Track

Candidates for this certification must pass two exams: one focusing on .NET Framework 2.0 foundation skills and one focusing on developing distributed applications.

The courses listed below are recommended to prepare you for the associated exam.

1. Study the designated MCTS Self-Paced Training Kit and pass the exam associated with the book.

MCTS Self-Paced Training Kit
