MCTS: .NET Framework 2.0 Web Applications

The Microsoft Certified Technology Specialist certifications let professionals target specific technologies and distinguish themselves by demonstrating in-depth knowledge and expertise in their subject area technologies.

Developers holding the Microsoft Certified Technology Specialist: .NET Framework 2.0 Web Applications (MCTS: .NET Framework 2.0 Web Applications) certification have demonstrated breadth and depth of skills and knowledge of Web application technology and data access in Web applications.

Technology Specialists are typically pursuing careers as a Web developer, Windows developer, or enterprise applications developer. They may also be individuals such as database developers and systems administrators who do not work with the .NET Framework 2.0 on a daily basis but who wish to show their breadth of technology experience.

Certification Track

Candidates for this certification must pass two exams: one focusing on .NET Framework 2.0 foundation skills and one focusing on Web-based client development.

The courses listed below are recommended to prepare you for the associated exam.

1. Study the designated MCTS Self-Paced Training Kit and pass the exam associated with the book.

MCTS Self-Paced Training Kit
