

## ACTC: Apple Certified Technical Coordinator 10.5

7 days of Instructor led training - 2 exams

### ACTC: Apple Certified Technical Coordinator (Two Exams Required)

This certification is ideal for Mac OS X technical co-ordinators and entry-level system administrators who provide technical support to Mac OS X users, as well as maintain the Mac OS X Server platform.

### Certification Track

ACTC: Apple Certified Technical Co-ordinator (ACTC) certification verifies a foundation in Mac OS X and Mac OS X Server core functionality and an ability to configure key services and perform basic troubleshooting of the essential Mac OS X and Mac OS X Server capabilities. The currently required exams are based on Mac OS X and Mac OS X Server v10.5.

### Who Should Seek ACTC Certification?

The ACTC certification is intended for Mac OS X technical co-ordinators and entry-level system administrators tasked with maintaining a modest network of computers using Mac OS X Server. Since the ACTC certification addresses both the support of Mac OS X clients and the core functionality and use of Mac OS X Server, the learning curve is correspondingly longer and more intensive than that for the Apple Certified Support Professional (ACSP) certification, which addresses solely Mac OS X client support.

This certification is not intended for high-end systems administrators or engineers, but may be an excellent step to take on an intended career path to system administration.

### Requirements

For **NEW** Certification

New candidates for ACTC certification are required to pass two exams:

- **Mac OS X Support Essentials v10.5 Exam (9L0-402)**

Covers a practical knowledge of the core functionality of Mac OS X 10.5 and the basics of managing Mac OS X client systems running Mac OS X version 10.5. The recommended preparatory course for this exam is the [Mac OS X Support Essentials v10.5](#) course.

## ACTC: Apple Certified Technical Coordinator

*7 days of Instructor led training - 2 exams*

### ACTC: Apple Certified Technical Coordinator (*Two Exams Required*)

**NOTE:** Candidates earn the Apple Certified Support Professional (ACSP) 10.5 certification upon successful completion of the exam above. To earn ACTC 10.5 certification, you must also pass the next exam listed below.

- **Mac OS X Server Essentials v10.5 Exam (9L0-509)**

Covers a practical knowledge of the features of Mac OS X Server 10.5. The recommended preparatory course for this exam is the [Mac OS X Server Essentials v10.5](#) course.

**NOTE:** Due to the considerable number of changes and new features from Mac OS X v10.4 Tiger to v10.5 Leopard, there are no update exams for Tiger to Leopard certifications.

### Registration

Exams are administered by Prometric, a worldwide provider of comprehensive technology-based testing and assessment services, at testing centres worldwide.

Candidates are required to have an Apple Tech ID number before registering for an exam. You can apply for a Tech ID by following the instructions at [certifications.apple.com](http://certifications.apple.com). Then, to register for an exam, call Prometric toll-free on 1300 368 785 or register online at [2test.com](http://2test.com).
