

Agile Project Management Training Courses

Learn to adapt more quickly to changing realities through frequent iterations, flexible adaptation, collaborative teamwork and self-organisation.

AgilePM® is a registered trademark of Dynamic Systems Development Method Ltd. The APMG International AgilePM and Swirl Device logo is a trademark of The APM Group Limited.

Agile Project Management replaces rigid waterfall approaches and allows for changing requirements resulting in more flexible 'I know when I see it' type environments. Small releases flesh out product complexities early in the project, and developers can focus on delivering high-valued functionality ahead of other mundane features. With Agile, quality is built by design.

Agile Project Management Foundation (3 days)

Gain an understanding of how Agile Project Management processes can guide the planning, management and control of successful Agile projects.

Learning Outcomes

On successful completion of this course, participants will be able to:

- Understand what is Agile and major Agile approaches
